P.O. Drawer 11649  
Columbia, S.C. 29211

**Representatives:**

This letter of protest is in reference to Docket No. 2009-489-E. The constant SCE&G increases places the homeowners in tight and straineous debt situation. Too many in high position are receiving bonuses with our hard earned money. Someone needs to take a closer look at this and make the necessary adjustments. Many retirerees did not receive a cost of living increase and the stimulus did not provide the assistance expected. A closer review of entitlements should've been done prior to the distribution of funds.

Also, there are many other ways to cut pollution and provide the customer's need. A nuclear plant is NOT the answer! South Carolina already takes in too much waste from other states and we don't need to add to it. The Columbia areas and its counties are a very beautiful place to live in. The soil is mostly sand plus and the rains are absorbed immediately. Therefore, any chemicals, insecticides, and nuclear waste would affect Thousands if not already. We no longer need or want this!

It is important for the customers to standup for what is right and wrong.
